

## INFRASTRUCTURES—RENEWABLES—CONCESSIONS—NEW TECHNOLOGIES

Elecnor is one of Spain's leading groups in engineering, construction and development of projects related to infrastructure, renewable energy and new technology. The company has more than 11,000 employees and currently operates in over 30 countries. Its main markets are Central America, South America, Africa and the Middle East.

### Since 1958

Elecnor began operating in the electrical industry in 1958. Over the course of its history, the company has engaged in strategic sectorial and geographical diversification.

The company was involved in the business structure that launched the first Spanish boom in the 1960s. It then took part in many of the sectors and activities that played a leading role in Spanish economic development. The following notable territorial, sectorial and organisational

milestones have featured throughout Elecnor's history.

### 1958–1969

#### Early stages

- Elecnor was incorporated on 6 June 1958
- Growth and consolidation on the electrical installation and facilities market
- Domestic expansion
- Beginning of international expansion

### 1970–1979

#### Growth

- Initial activities alongside Telefónica in telecommunications infrastructure
- International expansion begins with the company entering the Latin American market: subsidiaries are opened in Brazil and Ecuador

### 1980–1989

#### Consolidation

- The Ivoiror Project in Côte d'Ivoire, first turnkey project
- Expansion un Africa and Central America
- Consolidation within the Telecommunications and Railway sectors
- Entry to the Gas and Automation and Control sectors
- First contracts with Renfe

### 1990 – 2000

#### International expansion

- Strong international presence and expansion into new markets
- Start of activity in the environmental sector
- Promotion of investment projects
- Enerfín creation to participate as a developer and investor in wind projects

## INFRASTRUCTURES—RENEWABLES—CONCESSIONS—NEW TECHNOLOGIES

**2000–2010**

**Renewables and  
concessions**

- A benchmark in renewable energy
- Ambitious wind and solar power projects, both on the domestic and international markets
- Strong development in concessions
- Electric power transmission systems in Brazil, Mexico, Chile and Venezuela
- An environmental project in Aragon in the water purification sector

### Today

The main features which define Elecnor's current identity are:

- A company which is listed on the **Spanish Stock Exchange Continuous Market.**
- **13,000 highly qualified professionals** who are always receiving new training and skills.

- An established presence in over **30 countries.**
- **Four large business areas:** Infrastructures, Renewables, Concessions, and New Technologies.
- 2012 consolidated turnover of **1,931** euros.
- The company made a net profit of **87.6 million euros** in 2012
- The integration of Environmental Management, Quality, Workplace Risk Prevention and R&D&i.

### Business areas

Elecnor is involved in four business areas.

**Elecnor Infrastructures** is the heart of the company's business. Elecnor is a leader in infrastructure projects within electrical, gas, telecommunications, installations, maintenance, construction, environmental, water and railway

industries. This division handles various specialised brands such as Hidroambiente, Ehisa, Adhorna and Audeca.

**Elecnor Renewables** promotes, develops and runs projects related to clean energy, both in Spain and abroad, with the skills of take on projects in wind power, thermoelectric and photovoltaic solar power, hydroelectric plants and biomass. In wind power, Elecnor stands out with its subsidiary Enerfín, national and international reference in this kind of energy. On the other hand, Atersa, its
